DEADMAN HANDLE

Engineered for Performance.
Built for Reliability.

PRODUCT OVERVIEW

The CES Deadman Handle is precision-engineered to provide operator safety and complete control over abrasive flow during blasting operations. Manufactured from high grade aluminium with quality components for durability, corrosion resistance and long service life.

SPECIFICATIONS

SPECIFICATION	DETAILS
 Part No.	CES-DMH-1891
 Material	High Grade Aluminium
 Working Pressure	12 Bar
 Test Pressure	16 Bar
 Weight	300 g
 Suitable For	100 & 200 Litre Blasting Pots

KEY BENEFITS

POSITIVE SAFETY CONTROL

Deadman mechanism ensures abrasive flow only when handle is engaged.

ERGONOMIC HANDLE ACTION

Designed for comfortable grip and smooth operation, reducing operator fatigue.

CONSISTENT PERFORMANCE

Provides precise control for efficient blasting with minimal pressure drop.

SIMPLE MAINTENANCE

Easy to inspect, service and replace parts, minimizing downtime.

IDEAL FOR BLASTING APPLICATIONS

Sand Blasting

Shot Blasting

Industrial Use

Shipyards

Maintenance
& Repair

Heavy Duty
Applications
