

# 80 MESH

Product by JETBLAST INTL. EGYPT LLC

High speed, low consumption abrasive, ideal for removing thin coatings and mill scale.

Jetblast Indian Garnet 80 Mesh premium abrasive is a versatile product, ideal for new steel and fabrications. The superior mineral properties of Jetblast Indian Garnet enable high productivity rates and an exceptional surface finish.

## KEY PRODUCT FEATURES

- Fragmented particle size distribution for optimal cutting and cleaning performance
- Ideal for removal of thin coatings and mill scale
- Creates uniform profile to suit majority of coating applications
- Low consumption with increased speed, reducing costs and waste

## PRODUCT APPLICATION

- High speed, low consumption abrasive
- Removal of thin coatings and mill scale
- Removal of light rust
- Provides uniform surface profile for optimum coating adhesion

## PERFORMANCE

- Average profile ranges 60-150 µm
- Blasting rates up to 35000 /hr
- Consumption rate from 8 kg/m<sup>2</sup>

## INDUSTRY APPLICATION

- Oil and Gas
- Steel fabrication
- Automotive
- Marine
- Construction
- Infrastructure

## THE JETBLAST INDIAN GARNET DIFFERENCE QUALITY

### WORLD-CLASS PRODUCTS

High quality garnet abrasives with low consumption and uniform surface that are optimized to perform.

### QUALITY ASSURED

Follow us on our social channels for advice, answers, product information and more.

### WORLD-CLASS SUPPORT SERVICES

From a training course and site consultation, we have the resources to support your productivity.
